PROJECTS

JobBord (Job Listing Website) | React, MongoDB, Express, Nodejs

- Built RESTful APIs with Node.js and Express.js to handle CRUD operations, user sessions, and data retrieval from MongoDB.
- Designed and implemented secure user authentication and authorization with JWT (JSON Web Tokens) and bcrypt for password hashing.
- Created a seamless user experience with dynamic routing for navigating between job listings, job details, user profiles, and other pages.
- Used React's state management and context API to handle application state, providing a responsive and dynamic user experience.

Spotify Clone | HTML, CSS, JavaScript

- Built using HTML, CSS, and JavaScript, ensuring a lightweight and responsive user experience.
- Fetched songs from local files, allowing users to listen to their own music collection.
- Simplified **user interface**, designed for easy navigation and playback control.

[Portfolio Website](#) | Reactjs

- Developed a Portfolio website using the React framework to better user experience.
- Styled the app using CSS for responsive design and components for enhanced functionality.

[Landing Page](#) | HTML, TailwindCSS

- Developed a landing page using purely HTML and TailwindCSS, catering to clients seeking services.
- Designed a visually appealing and interactive user interface featuring, images, to enhance user engagement and browsing experience.
- Customized CSS animations and transitions to create smooth and fluid interactions, providing visual feedback and enhancing overall user satisfaction.
